La San Marco  
Made in Italy 

**TOP 85**

TOP 85 2gr.

TOP 85 represents the technical evolution of the historical and famous Series 85, which is appreciated in Italy and all over the world. In addition to its renown characteristics of robustness and reliability, La San Marco has now added a modern display, an illuminated working surface with multicoloured LEDS and automatic electronic control of the boiler temperature. The new glossy white and satin white colours, together with anti-fingerprint stainless steel, enhance the new look of the TOP 85.

**TOP 85**

**TOP 85**

TOP 85 3gr.

TOP 85 uses an ergonomic and functional back-lit keyboard for every group. All keyboards are connected electronically to a graphical display, which integrates the programming performed using the keyboards. This makes additional settings and controls possible and provides a series of information that is very useful for the user.

Another new feature is the use of a filter cup holder and steam/water levers with a new handle with an extremely modern, ultra-ergonomic design. TOP 85 is offered in the standard version with a flow variator or in the version with the DTC system, which provides an additional heat exchanger in the brewing unit.

TOP 85 SPRINT
