Weight and dimensions

- Dimensions of product (WxDxH): 256 x 340 x 444 mm
- Weight of product: 8.9 kg

Customize your coffees

This Super-Automatic machine offers an abundance of indulgent options to customize your beverage to your taste. You can easily personalize and memorize length, strength and temperature for each drink. Feel free to explore, experiment and dream up any drink!

Ceramic grinders

The robust 100% ceramic grinders guarantee a moment of pure coffee indulgence for years to come. The ceramic material creates the ideal grind, which allows the water to flow through steadily, extracting the purest essence of the beans. And unlike other 'regular' grinders', the ceramic material prevents the coffee from overheating and tasting burnt.

Auto-Rinse & Guided descaling

This espresso machine automatically cleans its coffee circuit with water upon starting up or switching off of the machine, this delivers a great, fresh taste with each cup of coffee. Regular descaling prolongs your espresso machine's life. This machine will prompt when descaling is needed. It will guide you with on-screen messages what you have to do and when.

Quick heat boiler

The Quick heat boiler ensures a hot coffee and cappuccino for you family from the first cup, in no time. The secret is in its light aluminum and stainless steel body, which can reach hot temperatures, fast.

Personal user profile

Store the length of any coffee and milk beverage according to your personal taste. You will be able to drink espresso, coffee and all other beverages always as you prefer, at the touch of a button.

Front loading for easy access

Your super-automatic espresso machine is effortless to use thanks to the frontal loading of the water tank and the dump box.

Adjustable coffee spout

The adjustable spout on our espresso machines will fit every cup and thus prevents the coffee splashing or cooling down while pouring in your cup. This way your espresso is always served at the right temperature while maintaining a clean machine.

Classic milk frother

The Classic Milk Frother, which baristas also call Pannarello, dispenses steam to help you easily prepare soft milk foam for your cappuccino. Unleash your inner barista by preparing your delicious milk specialties the traditional way!

3 beverages at one-touch

Enjoy your favourite drinks for your special moments. Whether you crave for an espresso, a coffee or a milk based recipe, your Super-automatic machine delivers a perfect in-cup result with no hassle and in no time!

Removable brewing group

The brewing group is the heart of every super-automatic coffee machine, and should be cleaned regularly. The fully removable brewing group allows you to clean it thoroughly just by rinsing it under the tap
